Professional Summary

Aspiring Backend-Focused Full Stack Developer with hands-on experience building web applications using React.js, Node.js, Express.js, MongoDB, and JavaScript. Passionate about backend development, software engineering fundamentals, and problem solving through Data Structures & Algorithms. Enjoy building secure REST APIs, implementing authentication systems, and continuously learning modern technologies while working on real-world projects. Looking for an opportunity to grow, contribute, and learn from experienced engineers.

Technical Skills

- Languages: JavaScript (ES6+), Python, Basic SQL, HTML5, CSS3
 - Backend: Node.js, Express.js
 - Frontend: React.js, Vite, Tailwind CSS, Bootstrap
 - Database: MongoDB, Mongoose
 - Authentication: JWT, HTTP-only Cookies, bcrypt
 - Tools: Git, GitHub, Postman, VS Code
 - Core Concepts: REST APIs, CRUD, MVC Architecture, OOP, DSA
-

Projects

AI Interview Preparation Platform

- Built a full-stack AI-powered interview preparation platform using React, Node.js, Express.js and MongoDB.
- Implemented secure JWT authentication with HTTP-only cookies and bcrypt.
- Developed REST APIs following MVC architecture.
- Integrated Google Gemini API for interview questions, resume feedback and skill-gap analysis.
- Generated downloadable PDF reports using Puppeteer.

Full Stack Task Management Application

- Developed a responsive task management application using React, Express.js and MongoDB.
 - Implemented complete CRUD functionality through REST APIs.
 - Designed reusable React components and persistent task storage.
-

Education

Bachelor of Engineering (Mechanical Engineering)

Datta Meghe College of Engineering

CGPA: 6.75

Achievements

- Built multiple full-stack web applications using the MERN stack.
- Integrated Google Gemini API into a real-world learning project.
- Regularly practice Data Structures & Algorithms.
